DESCRIPTION OF WORK AND SPECIFICATIONS

SCOPE OF WORK:

The work consists of the legal demolition, removal and disposal of the structures located on the subject properties. The structures included but are not limited to single family residences, accessory buildings, associated foundations, slabs, footings, driveways, walkways, decks/porches, culvert(s), electric service, gas service, water well, septic system and appurtenances. The removal and legal disposal of any tree, shrub or other vegetation that impedes or may impede the ability to complete the work and any other trees taken down in the course of demolition will be at the contractor's expense. Once the demolition and removal is complete the site shall be restored by grading the site to tie into the existing adjacent grades and drainage ditches, six inches (6") of topsoil applied, turf grass seed applied and erosion control blankets installed as part of this bid.

The work includes the carrying out of all duties and obligations and the furnishing of all labor, material, tools, equipment, and other incidentals necessary or convenient to the successful completion of the project. The contractor shall be responsible for obtaining all required permits prior to the commencement of related work. Receipts for disposal of materials, equipment and debris and refuse shall be provided with each invoice. Landfill or scrap yard must be used. All items shall be removed from the site. All recyclables must be properly recycled, there is not guarantee of the dollar values for salvage by the contractor.

Pre-bid meeting to view photos of subject property and obtain history of such will be held on Thursday, October 13, 2021 at 10:00 a.m. (CST) at the Administration Building, 667 Ware Road, Conference Room C, as well as via Microsoft Teams. (to participate in the Microsoft Teams Virtual Pre-bid, you must complete and submit the "INVITATION-INTENT" to bid with a valid email address *no later than noon 12:00 p.m. (CST) October 12, 2021*). It is highly recommended interested parties attend the pre-bid meeting. **Property addresses will not be given out over the telephone or by email.**

ADDITIONAL REQUIREMENTS:

THIS IS A PREVAILING WAGE BID AND SUBJECT TO DAVIS BACON ACT.

PERMITS AND FEES

All permits and utility disconnections required shall be obtained and paid for by the Contractor. The Contractor will be required to furnish copies of all required permits and documentation that all fees have been paid to the McHenry County Planning and Development Department. McHenry County will acquire and waive fees for demolition, well and septic abandonment permits. **Any other permits, and costs associated with the utility disconnections shall be included within the contractor's bid.**

HAZARDOUS MATERIALS

The County has included the lead and asbestos testing results within the bid documents and the legal removal of hazardous materials shall be included in the bid price. There may be additional hazardous materials on site. Environmental testing was limited by unsafe building conditions. If hazardous materials are identified during demolition, the vendor should notify the County, take appropriate safety precautions, and remove and dispose of materials appropriately subject to contract amendment. Where special handling of material is required, the price for the removal and disposal will be based on the unit price provided in this bid or negotiated if required.

CONSTRUCTION REQUIREMENTS

The Contractor shall be familiar with the work site. The Contractor should be aware of the size, type, and materials of the existing structures. All structures within the sites indicated are to be demolished. Building foundations, including basement walls and floor slabs, footings, and other clean construction debris shall be excavated and removed to a depth of thirty-six (36) inches, minimum. Any concrete floor shall be broken up in a uniform manner so as to allow percolation of water across the entire area.

The contractor shall receive approval to proceed by McHenry County Planning and Development prior to backfilling the foundations with clean fill. Prior to the placement of fill, all accumulations of debris in the basements, crawl spaces, and areaways about the site resulting from the demolition operations shall be removed. The Contractor shall fill all excavations, basements, crawl spaces, and areaways of each building to the level of the surrounding area, with suitable fill as specified herein. Broken concrete shall only be utilized as fill within any existing basement(s) below a depth of thirty-six (36) inches. A minimum twelve-inch soil layer of clean fill is necessary with the top six inches of any fill area to be topsoil. No areas shall be filled higher than the adjacent grades. The culvert and associated drive shall be removed, and the drainage ditch restored to connect to the adjacent drainage ditches on either side and facilitate flow.

Upon Notice to Proceed, the Contractor shall proceed promptly with the demolition and removal of all items, notifying the McHenry County Planning and Development Department at least three (3) working days in advance of commencing operations.

The Contractor shall notify all appropriate utilities, local police, and fire departments prior to the start of demolition.

The use of explosives or the burning of structures in the performance of this work will not be permitted.

The Contractor shall not remove, damage or disturb any appurtenances of private or public utilities that are not part of the demolition work.

The Contractor shall assume full responsibility to preserve the integrity of adjacent buildings and shall provide such bracing and/or supports as may be necessary to protect the adjacent buildings.

SALVAGED MATERIALS

The salvage value of demolition materials shall be reflected in the contract lump sum price for demolition of the site indicated. Any demolition materials salvaged for resale shall not be sold from the demolition sites. It is the responsibility of the Contractor to remove the materials from the demolition sites to an alternate location for sale and to comply with all local requirements for the sale of materials. The County does not guarantee any profits associated with Salvaged Materials.

BASIS OF PAYMENT

This work will be paid for at the contract lump sum price at job completion, of the site indicated, which price shall include all labor, materials, and equipment necessary to complete the work as specified herein.

RESTORATION

DESCRIPTION

This work shall consist of grading the demolition site placing of six inches (6") of topsoil, and, establishing a vegetative covering of turf grass.

CONSTRUCTION REQUIREMENTS

All excavations resulting from demolition or related removals will be backfilled and compacted to the satisfaction of McHenry County. All debris caused by the demolition and existing miscellaneous debris on the property shall be removed from the site and the site graded to provide free flow of storm water runoff from the site following existing contours.

UTILITY CONNECTIONS

DESCRIPTION

This work consists of verifying that all utilities have been disconnected and that the service from the provider has been secured to the satisfaction of the provider. The Contractor will be required to furnish to McHenry County documentation that the service has been disconnected to the satisfaction of the provider.

DISCONTINUANCE OF UTILITIES

The Contractor shall coordinate the disconnect of all utilities that serve each building in compliance with the requirements and regulations of the agency or utility involved. All operations shall be performed in such a manner as to avoid creating hazards to persons, property, and interference with the use of adjacent buildings or obstruction of vehicular and pedestrian access thereto. All abandoned utilities shall be terminated at least two (2) feet below the finish grade of the site. **Costs associated with the utility disconnections shall be included within the contractor's bid.**

WATER, SANITARY, STORM SEWER, SEPTIC, AND WELL SERVICE DISCONNECTIONS

DESCRIPTION

This work consists of disconnecting water and sanitary services in accordance with the requirements of the County and the IEPA.

This work shall also consist of the removal of any septic tank and capping of any well. The septic tank(s) shall be pumped, have the floors and walls cracked or crumbled so the tank will not hold water, and be filled with sand or other clean fill in a method approved by the McHenry County Department of Health.

HAZARDOUS MATERIALS – REMOVAL AND DISPOSAL

DESCRIPTION

The County shall provide the contractor with lead and asbestos testing results prior to the execution of the contract. The contractor shall also inspect each site prior to commencement of demolition to identify hazardous materials present on the site and to notify the Director of Planning and Development of any hazardous material for a determination of disposal.

PERSONNEL EXPERIENCE

The contractor must provide laborers and equipment operators possessing OSHA Hazardous Waste Site Worker Certification as required in 29 CFR 1910.120.

The contractor must also provide a plan addressing site health and safety, site control and emergency response measures that meet current OSHA requirements. The plan should also include controls for protecting public health and the environment.

DISPOSAL

Where special handling of material is required, the price for the removal and disposal will be negotiated on a site by site basis. Removal of underground fuel storage tanks and adjacent contaminated materials is not eligible for Public Assistance reimbursement. Such tanks should be removed and disposed under the Leaking Underground Storage Tank (LUST) Program administered by the Illinois Environmental Protection Agency.

MUNICIPAL WASTE HAULER LICENSING ORDINANCE REQUIREMENTS (in part)

- A) Persons or companies in the business of hauling discarded materials within McHenry County, through their municipal waste collection and transportation activities, constitute a significant component of the traffic upon County roads and State highways within this County, contributing to deteriorating air quality and road wear, and creating the potential for litter and leaking loads, so that licensing of

municipal waste haulers is necessary to protect the public health and the environment and to reduce undue damage to the public infrastructure; and

- B) Persons or companies in the business of hauling municipal waste, recyclable materials and compostables within McHenry County, through their collection and transportation activities, are able to supply the County with information necessary for long-term municipal waste planning and therefore should be required to submit annual information about their hauling activities to the County.

101 EXEMPTIONS

101.1 *The following persons or entities shall not be subject to this Ordinance:*

3. *Demolition or construction contractors or landscaping companies that produce and transport discarded materials in the course of such occupations, where the discarded materials produced are merely incidental to the particular demolition, construction, or landscaping work being performed by such companies.*

ASBESTOS ABATEMENT (GENERAL CONDITIONS)

DESCRIPTION

This work may consist of the removal and disposal of friable and non-friable asbestos from the building(s) to be demolished. All work shall be done according to the requirements of the U.S. Environmental Protection Agency (USEPA), the Illinois Environmental Protection Agency (IEPA), the Occupational Safety, and Health Administration (OSHA), and as outlined herein.

The Materials Description Table provides a brief description of the various Asbestos Containing Materials (ACM) for each site. The table states whether the ACM is friable or non-friable and states the approximate quantity.

All friable asbestos shall be removed from the building(s) prior to demolition. The Contractor has the option of removing the non-friable asbestos prior to demolition or demolishing the building(s) with the non-friable asbestos in place.

The Contractor shall provide a shipping manifest to the Director of Planning and Development for the disposal of all ACM wastes.

PERMITS

The Contractor shall apply for permit(s) in compliance with applicable regulations of the Illinois Environmental Protection Agency. Any and all other permits required by other federal, state, or local agencies for carrying on the work shall be the responsibility of the Contractor. Copies of these permits shall be provided to the Director of Planning and Development.

NOTIFICATIONS

The "Demolition/Renovation Notice" form, which can be obtained from the IEPA office, shall be completed and submitted to the address listed below at least 10 days prior to commencement of any asbestos removal or demolition activity. Separate notices shall be sent for the asbestos removal work and the building demolition if they are done as separate operations.

Asbestos Demolition/Renovation Coordinator
Illinois Environmental Protection Agency
Division of Air Pollution Control
P. O. Box 19276
Springfield, Illinois 62794-9276
(217) 785-1743

Notices shall be updated if there is a change in the starting date or the amount of asbestos changes by more than 20 percent.

SUBMITTALS

All submittals and notices shall be made to the Director of Planning and Development, except where otherwise specified herein.

SUBMITTALS THAT SHALL BE MADE PRIOR TO START OF WORK

- Submittals required under Asbestos Abatement Experience.
- Submit documentation indicating that all employees have had medical examinations and instruction on the hazards of asbestos exposure, on use and fitting of respirators, on protective dress, on use of showers, on entry and exit from work areas, and on all aspects of work procedures and protective measures as specified in Worker Protection Procedures.
- Submit manufacturer's certification stating that vacuums, ventilation equipment, and other equipment required to contain airborne fibers conform to ANSI 29.2.
- Submit to the Director of Planning and Development the brand name, manufacturer, and specification of all sealants or surfactants to be used. Testing under existing conditions will be required at the direction of the Director of Planning and Development.
- Submit proof that all required permits, site locations, and arrangements for transport and disposal of asbestos-containing or asbestos-contaminated materials, supplies, and the like have been obtained (i.e., a letter of authorization to utilize designated landfill).
- Submit a list of penalties, including liquidated damages, incurred through noncompliance with asbestos abatement project specifications.
- Submit a detailed plan of the procedures proposed for use in complying with the requirements of this specification. Include in the plan the location and layout of decontamination units, the sequencing of work, the respiratory protection plan to be used during this work, a site safety plan, a disposal plan including the location of an approved disposal site, and a detailed description of the methods to be used to control pollution. The plan shall be submitted to the Director of Planning and Development prior to the start of work.
- Submit proof of written notification and compliance with Paragraph "Notifications."

SUBMITTALS THAT SHALL BE MADE UPON COMPLETION OF ABATEMENT WORK

- Submit copies of all waste chain-of-custodies, trip tickets, and disposal receipts for all asbestos waste materials removed from the work area.
- Submit daily copies of work site entry logbooks with information on worker and visitor access.
- Submit logs documenting filter changes on respirators, HEPA vacuums, negative pressure ventilation units, and other Director of Purchasing controls; and
- Submit results of any bulk material analysis and air sampling data collected during the course of the abatement including results of any on-site testing by any federal, state, or local agency.

ASBESTOS ABATEMENT EXPERIENCE

Company Experience: Prior to starting work, the Contractor shall supply evidence that he/she has been prequalified with the Illinois Capital Development Board and that he/she has been included on the Illinois Department of Public Health's list of approved Contractors.

PERSONNEL EXPERIENCE

For Superintendent, the Contractor shall supply:

Evidence of knowledge of applicable regulations in safety and environmental protection is required as well as training in asbestos abatement as evidenced by the successful completion of a training course in supervision of asbestos abatement as specified in 40 CFR 763, Subpart E, Appendix C, EPA Model Contractor Accreditation Plan. A copy of the certificate of successful completion shall be provided to the Director of Planning and Development prior to the start of work.

Documentation of experience with abatement work in a supervisory position as evidenced through supervising at least two asbestos abatement projects; provide names, contact, phone number, and locations of two projects in which the individual(s) has worked in a supervisory capacity.

For workers involved in the removal of friable and non-friable asbestos, the Contractor shall provide training as evidenced by the participation and successful completion of an accredited training course for asbestos abatement workers as specified in 40 CFR 763, Subpart E, Appendix C, EPA Model Contractor Accreditation Plan. A copy of the certificate of successful completion shall be provided to all employees who will be working on this project.

ABATEMENT AIR MONITORING

The Contractor shall comply with the following:

PERSONAL MONITORING

All personal monitoring shall be conducted per specifications listed in OSHA regulation, Title 29, Code of Federal Regulation 1926.58. All area sampling shall be conducted according to 40 CFR Part 763.90. All air monitoring equipment shall be calibrated and maintained in proper operating condition. Excursion limits shall be monitored daily. Personal monitoring is the responsibility of the Contractor. Additional personal samples may be required by the Director of Planning and Development at any time during the project.

CONTAINED WORK AREAS FOR REMOVAL OF FRIABLE ASBESTOS

Area samples shall be collected for the department within the work area daily. A minimum of one sample shall be taken outside of the abatement area removal operations. The Director of Planning and Development will also have the option to require additional personal samples and/or clearance samples during this type of work.

INTERIOR NON-FRIABLE ASBESTOS-CONTAINING MATERIALS

The Contractor shall perform personal air monitoring during removal of all nonfriable Transite and floor tile removal operations. The Director of Planning and Development will also have the option to require additional personal samples and/or clearance samples during this type of work.

EXTERIOR NON-FRIABLE ASBESTOS-CONTAINING MATERIALS

The Contractor shall perform personal air monitoring during removal of all nonfriable cementitious panels, piping, roofing felts, and built up roofing materials that contain asbestos. The Contractor shall conduct downwind area sampling to monitor airborne fiber levels at a frequency of no less than three per day.

AIR MONITORING PROFESSIONAL

All air sampling shall be conducted by a qualified Air Sampling Professional supplied by the Contractor. The Air Sampling Professional shall submit documentation of successful completion of the National Institute for Occupational Safety and Health (NIOSH) course #582 - "Sampling and Evaluating Airborne Asbestos Dust". Air sampling shall be conducted according to NIOSH Method 7400. The results of these tests shall be provided to the Director of Purchasing within 24 hours of the collection of air samples.

REMOVAL AND DISPOSAL OF ASBESTOS

DESCRIPTION

This work shall consist of the removal, transportation, and disposal of asbestos containing materials (ACM). All friable asbestos shall be removed from the building(s) prior to demolition. The Contractor has the option of removing the non-friable asbestos prior to demolition or demolishing the building(s) with the non-friable asbestos in place.

The removal and disposal of all friable asbestos from the building(s) and site(s) prior to demolition shall be done according to the Special Provision titled "Asbestos Abatement (General Conditions)" and as outlined herein.

The Contractor has the option of removing and disposing of the non-friable asbestos prior to demolition of the building(s) or demolishing the building(s) with the non-friable asbestos in place.

Option #1 - If the Contractor chooses to remove all non-friable asbestos prior to demolition, the work shall be done according to the Special Provision titled "Asbestos Abatement (General Conditions)".

Option #2 - If the Contractor chooses to demolish the building(s) with the non-friable asbestos in place, the following provisions shall apply:

1. Continuously wet all non-friable ACM and other building debris with water during demolition.
2. Dispose of all demolition debris as asbestos containing material by placing it in lined, covered transport haulers and placing it in an approved landfill.

OTHER HMGP CONTRACT REQUIREMENTS

The contract documents shall also contain the following miscellaneous contract provisions as required by 44 CFR, Part 13.36:

1. Compliance with Executive Order 11246, entitled Equal Employment Opportunity, as amended by Executive Order 11375, and as supplemented by the Department of Labor regulations (41 CFR, Section 60).
2. Compliance with the Copeland Anti-Kickback Act (18 U.S.C. 874), as supplemented by the Department of Labor regulations (29 CFR, Part 3).
3. Compliance with Sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-330), as supplemented by Department of Labor regulations (29 CFR, Part 5).
4. Access by the Grantee (State of Illinois), Jurisdiction (McHenry County), Federal grantor agency (FEMA), Comptroller General of the United States, or any duly authorized representative, to any books, documents, papers and records of the contractor which are directly pertinent to the contract for the purpose of performing audits, examinations, excerpts, and transcripts shall be provided upon request.
5. Retention of all required records for three years after the jurisdiction makes final payments and all other pending matters are closed.
6. Compliance with all applicable standards, orders or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency (EPA) regulations (40 CFR, Part 15).

BASIS OF PAYMENT

This work will be paid for at the contract unit price per lump sum for REMOVAL AND DISPOSAL OF FRIABLE ASBESTOS and REMOVAL AND DISPOSAL OF NON-FRIABLE ASBESTOS. The contract unit price for Removal and disposal of Friable Asbestos shall include furnishing all labor, materials, equipment, and services required to remove and dispose of the friable asbestos.
