The certified payroll records must include for every worker employed on the public works project the name, address, telephone number, social security number, job classification, hourly wages paid in each pay period, number of hours worked each day, and starting and ending time of work each day. These certified payroll records are considered public records and public bodies must make these records available to the public under the Freedom of Information Act, with the exception of the employee's address, telephone number and social security number. ### **Quartermaster System Overview**

#### **System Capabilities**

- *Secure Online Ordering System*
  - Site is only accessible by users defined and approved by MCSO through unique user names and password assignment
- *Mobile Device Compatibility*
  - Site has a custom mobile experience for ease of on-the-go ordering
  - Compatible with all common mobile devices (smartphone or tablet)
- *Configurable based on MCSO Uniform Program Requirements*
  - Designed to support a broad range of MCSO uniform program requirements
  - A uniform program profile is established with MCSO to be serviced by the vendor. This profile defines the operating parameters in which the system will govern the program, to include: employee management, allotment management, product offering, delivery requirements, and invoicing.
- *Employee Management*
  - Vendor's system provides an employee based management and tracking segment.
  - Employee information, required to properly process order and provide management reports, is warehoused in the system's data storage. This information includes: employee code, name, anniversary date, department, rank, assigned location, designation, and employee group.
  - Historical & distribution data is also maintained for each employee. This data is the basis for management reports, and is collected as orders are placed and distributed. Historical data includes items distributed (to the size level), along with quantities and order/shipment dates.
- *Product Offering Management*
  - Product offerings for the uniform program are defined, and are assigned to the respective employee groups when a uniform program is established on the system.
  - Employee Groups, or shop-by locations, typically represents a job function or physical location. Such as shop by location/assignment for "Patrol", "Swat", "K-9", etc. with each group having a specific uniform products assigned to them. During order placement, only products

associated with the shop-by location/assignment the employee is assigned to will be available for order. This ensures that the employee can only order those products required for his/her job function.

- Vendor supports alterations, such as trouser hemming, application of badges, etc. These elements are defined based on the requirements of the uniform program, and may be limited to specific styles and employee groups.
- *“Package Ordering” Feature*
  - Feature allows MCSO to create “Packages” of items that are frequently ordered at the same time (ex. “New Hire Package,” “K-9 Assignment Package,” “SWAT Assignment Package,” “CERT Assignment Package,” or “Motorcycle Unit Package”)
  - Each employee’s “Package” orders are bundled and shipped together.
  - This feature reduces the number of clicks per order and reduces errors during order entry by ensuring that all needed items are ordered before processing
- *Allotment Management*
  - The system provides employee allotment management based on dollars OR units.
  - If permitted by the uniform program profile for the employee; employees may purchase uniforms in excess of their allotment amount via credit card.
  - Allotments may be renewed on the employee’s anniversary date or the beginning of the County’s fiscal year (December 1).
  - Allotment Management is required for the uniform program, the employee’s available allotment must be verified during the checkout process.
    - If the amount ordered exceeds the employee’s available allotment the program allows employee payments for amounts over the allotment via credit card, the checkout process remains active, and the employee will be prompted for credit card information during the checkout process.
    - If the program has an allotment limit by product category, the payment for the amount over allotment will be forced to a credit card if credit card purchases are allowed (i.e. MCSO will only pay \$100 toward a footwear purchase).
- *Controlled Uniform Order Placement*
  - The system controls uniform order placement by tying together the Employee, Product Offering, Shop-By Location and Allotment Management segments of the system, as governed by the uniform program profile.
  - The system provides a web-based method for MCSO uniform administrators or employees to place uniform orders. The product

offering and associated optional alteration options are displayed and based on the ordering employee's employee group assignment. Any mandatory alterations, such as standard department patch on garment, are hard coded in the system to ensure no mandatory alteration is missed during order placement on the website.

- System allows for orders to be placed using a "shop-by individual" feature which provides an administrator the ability to place a large bulk uniform order and segment the order down to the individual employee level, eliminating the necessity to place a separate order for each employee.
- *On-Line Order approval*
  - MCSO requires all orders to be approved by an Administrator prior to being processed. The vendor will allow for approval gates/levels to be established from shipping to order dollar amount which are defined in the Uniform Program Profile. These orders remain in a "Hold for Approval" status until released by an Administrator. The vendor provides information on these orders to the Administrators through system generated approval emails sent to the Administrator which allows the order to be approved through the links provided in the email, or on the Administrator's user dashboard on the website.
  - Upon order approval, the order is released for fulfillment. Denied orders assume a "denied" status, and are not released.
- *Flexible, On-Demand Management Reporting*
  - The vendor will provide flexible, on-demand reporting with output into Excel .xls or Excel .xlsx, which allows for easy review and manipulation of the data output by the Administrators. The reporting can be sent directly to the requestors email or reviewed from the reports dashboard.
  - Available reports will include:
    - Allotment Report
    - Order History Sales report
    - Itemized Sales report
    - Allotment Activity Report
    - Unit Allotment Activity Report
    - Backorder Report
    - Dropship Report
  - Within the various report offerings, the user may specify parameters such as date ranges, open or closed orders, or limit report data to a specific location or department, as applicable to the report.
- *MCSO management of employees*
  - The system will allow for department Administrators to have the ability to assign new users to the website, update user profiles, Shop-By Location, etc.
